

New Ground Rules for Utilizing and Restoring our Natural Resources

Robert Cervelli

Local Prosperity 2016 Miramichi

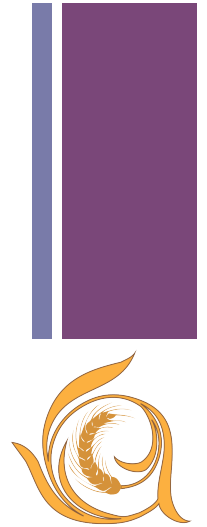

+ Examples of Unit Value in Forestry

■ Value delivered (approx)

- Pellet mill: \$28-37 / ton
- Pulp mill: \$40-44 / ton
- Stud mill: \$65 / ton
- Softwood lumber mill: \$75 / ton

+ Our Resources – New Ground Rules

1. Harvest technology is appropriately scaled for the restorative use of the resource
2. Market usage of the harvest should create an increase in per unit value
3. Harvesting and processing enterprises should be locally owned
4. Use of the resource should be locally controlled
5. Supply local needs and markets first, only then consider export
6. Use the resource in ways that increase local social capital
